RAJ BHAVAN,
SRINAGAR-190001**

MESSAGE

I am glad to know that the Planning Development & Monitoring Department is bringing out the Annual District Good Governance Index (DGGI) report 3.0 of the Union Territory of Jammu & Kashmir, 3rd in series, through Directorate of Economics & Statistics, J&K.

The Jammu & Kashmir is the pioneer Union Territory in the country to have Good Governance Index at District level which inter-alia provides futuristic roadmap to planners thereby providing an impetus to District Administration to carry forward good governance with progressive interventions.

DGGI will enable districts of J&K to evaluate their performance vis a vis some of the best-administered districts of the country and to work with renewed vigour towards time-bound disposal of office files and other matters, increased transparency, increased accountability and increased citizen participation. The next step would be to carry forward these Good Governance practices down to Tehsil and Block level. The index will benefit residents of Jammu and Kashmir in a big way as it will work contribute to further streamlining the district machinery, making districts result oriented and improving their delivery mechanism.

I am sanguine that the Index will provide an opportunity to each District of the UT to assess their performance under different sectors, schemes and programmes being implemented for the public good and contribute in improving the standard of living of general public by adopting best practices in respective fields.

I compliment the Planning Development & Monitoring Department and the entire team associated with the task for putting in their best efforts in bringing out the imperative DGGI Report 3.0.

Manoj Sinha
(Manoj Sinha)

Dr. Arun Kumar Mehta, IAS

Chief Secretary
Jammu & Kashmir.

MESSAGE

I am delighted to know that the Directorate of Economics & Statistics, J&K is issuing the Annual District Good Governance Index (DGGI) report (2022-23) - 3.0 of the Union Territory of Jammu & Kashmir.

The District Good Governance Index (DGGI) is setting new benchmarks for the District Administrations in the UT through adoption of emerging administrative reforms and best practices. Districts are competing among themselves on various deliverables on the basis of their rankings. The districts are ranked by appraising performance under ten different sectors based on 58 indicators. The DGGI report 3.0 would be a guidance for the districts to make more improvements in areas of governance.

The quality of governance mechanism at district level can be judged only by how well District Administrations function and deliver the outcomes expected from them. The DGGI helps in locating the gaps between targets and achievements. A sort of healthy competition for interventions aimed at public welfare sets in amongst district administration resulting in benefits to the general public.

I hope that the DGGI report 3.1, third in the series, would provide a blue print for improving district level governance with specific interventions.

I compliment the endeavour of the Planning Development & Monitoring Department and Directorate of Economics & Statistics for bringing out DGGI report 3.0.

(Dr. Arun Kumar Mehta)

Dr. Raghav Langer, IAS

Secretary to Government,
Planning Development &
Monitoring Department,
Govt. of Jammu & Kashmir

FOREWORD

There are certainly diverse methods to assess the performance of governance based on various parameters. They assist in monitoring the performance of Government and in better understanding the contribution of governance in its various dimensions to development.

The UT of J&K has taken a lead role in this perspective and the first edition of the District Good Governance Index report 1.0 was released in January 2022 by the Directorate of Economics & Statistics, J&K under the aegis of Department of Administrative Reforms, Public Grievances and Pensions, Government of India. The mathematical model for the Index was provided by the Center of Good Governance (CGG), Hyderabad.

The release of 2nd Edition of District Good Governance Index Report 2.0 was entrusted to the Planning Development & Monitoring Department through its Directorate of Economics & Statistics, J&K, the apex institution for collecting statistical data in the Union Territory. The Directorate of Economics & Statistics did a commendable job in bringing out the report for 2021-22 in September, 2022 making it an annual feature of the Department.

The approach for assessing the performance of governance based on empirical statistical data of ten core sectors helped in formulation of DGGI. The report shall assist the system of governance in decision making, resource allocation, addressing the specific gaps in delivering the public goods and foster a healthy competition amongst Districts based on their rankings. I hope the report of DGGI 3.0 shall provide a comparable progress for last three years to districts of UT of Jammu & Kashmir as a reference.

District Good Governance Index has now become an established tool to assess the performance of each district in different areas, schemes, programmes announced by the Government from time to time for the well-being of people, and provide opportunity to each district to rise to the level of some of the best administered districts of the country.

I appreciate the efforts put in by the Director General, Economics & Statistics, J&K and her team in bringing out 3rd edition of DGGI (3.0) report with added information like incremental progress amongst sectors, outcome & impact assessment etc.

Dr. Raghav Langer

Satvir Kour Sudan

Director General,
Economics & Statistics,
Govt. of Jammu & Kashmir

PREFACE

Good Governance is an approach to government that is committed to creating a system founded in measuring how public institutions conduct public affairs and manage public resources and guarantee the recognition of all rights in a manner essentially free of mistreatment and corruption and with due regard for the rule of law, transparency and accountability.

District being the primary unit of field administration under decentralized planning is entrusted with implementation of various developmental and welfare schemes & programmes for the benefit of the general public. It becomes obligatory to measure the performance of governance to keep the district administration focused on targeted tasks by introducing good governance interventions leading to holistic development of the general public as well as the administrative machinery.

The UT of J&K has taken lead in this initiative and released the First edition of the District Good Governance Index Report 1.0 for the year 2020-21 under the guidance of Department of Administrative Reforms, Public Grievances and Pensions, Government of India through JK IMPARD.

The publishing of second edition of District Good Governance Index report 2.0 for the year 2021-22 was entrusted to Directorate of Economics & Statistics and same was successfully prepared and released in September, 2022. The methodology adopted by the Center of Good Governance (CGG), Hyderabad to measure the performance of governance has been applied to measure the comparative performance of all the districts of UT of Jammu & Kashmir while compiling DGGI reports. The DGGI 3.0 for the year 2022-23, third in series presents a comparative ranking of Districts based on parameters of good governance initiatives under 10 sectors and 58 indicators.

I am very much thankful to District Development Commissioners for their support by providing the requisite data on the identified parameters and in particular Secretary to Government, Planning Development & Monitoring Department, J&K for steering and consistent encouragement in preparation of the report of DGGI 3.0.

The team of officers/ officials of the Directorate of Economics & Statistics and O/o Regional Director (Evaluation & Statistics), Jammu/ Kashmir associated with the assignment also deserve an appreciation for compiling/ finalizing the Annual District Good Governance Index (DGGI) report 3.0 (2022-23).

Satvir Kour Sudan

Executive Summary

Good governance is the process of measuring how public institutions conduct public affairs and manage public resources and guarantee the realization of public aspirations in a manner essentially free of abuse and corruption and with due regard for the rule of law. Good governance adds an evaluative attribute to the process of governing and based on different indicators, an index is computed to evaluate the performance and its impact.

One of the notable aspects of the DGGI reports is their emphasis on creating a healthy competition amongst district administrations to generate excellence in administrative affairs through best practices for the welfare of the general public. The success stories pouring in are an ample proof that release of DGGI reports is playing a catalytic role in making the district administrations more responsive and setting new benchmarks for other districts to emulate.

The DGGI has proven to be a valuable tool for promoting good governance, fostering healthy competition and driving innovation in Jammu and Kashmir. By continuously refining and expanding the scope of these reports, the government is demonstrating its commitment to establishing a transparent, accountable, and efficient governance system that caters to the needs of its citizens and drives sustainable development in the region.

The current issue of DGGI Report 3.0 is third edition in series based on data collected for the financial year 2022-23. The performance of District administrations of 20 Districts of UT of Jammu & Kashmir have been evaluated based on 10 sectors having significant role in the economy of the UT. Districts have been ranked based on scores achieved on 58 indicators spread across 10 selected sectors. Incremental change (increase/decrease) of the given indicators have been taken into consideration while calculating the scores.

District Jammu is on the top of composite ranking in DGGI 3.0 with an aggregate DGGI score of 6.377 while as District Reasi is ranked at the bottom with aggregate DGGI score of 4.461. District Samba & District Srinagar ranked 2nd and 3rd with an aggregate DGGI score of 6.180 & 6.005 respectively.

District Pulwama is the best performer in Agriculture and allied Sector mainly due to better performance in the indicators of Food & Horticulture production besides Kisan Credit Cards, Soil Health Cards and animals vaccinated.

District Srinagar is top performer in Industries and allied Sector, followed by Districts of Ganderbal and Jammu as the indicators like MSME units registered, establishment under GST Credit to handicrafts & Credit to Self-employment marked an increase in these districts.

District Samba, Kulgam & Ganderbal attained 1st, 2nd & 3rd rank under Human Resource Development sector by noticeable improvement in indicators like Retention Rate,

enrolment of SC, availability of Drinking water, Toilet & Electricity in Schools and Skill training to the students.

District Rajouri is ranked 1st in Public Health Sector followed by Districts of Reasi & Anantnag. This ranking in Public Health sector is due to impetus given to the indicators like distribution of Golden Cards, Reduction in MMR & IMR, provision of own buildings to Anganwadi centers, Health and Wellness Centers, provision for 4 ANC or more checkups and facilities of institutional deliveries.

Districts Jammu, Srinagar & Samba are top performers in Public Infrastructure and utilities sector with 1st, 2nd & 3rd ranks respectively, which reflects that these districts achieved targets of PMAY, Sanitation facilities, safe drinking water households electrified and all weather roads under PMGSY.

District Samba notched 1st rank under Social Welfare and Development sector followed by Rajouri and Udhampur Districts. Better performance in indicators like NSAP & ISSS, PMSBY, Atal Pension Yojana and off-take of food-grains helped these Districts to achieve top ranks in DGGI 3.0.

District Pulwama, Srinagar & Samba ranked 1st, 2nd and 3rd respectively in Financial Inclusion Sector. Increase in value of indicators like Mudra loan, PMSBY & Self-employment scheme helped them to achieve this position in DGGI 3.0.

District Anantnag, Jammu & Udhampur ranked 1st, 2nd & 3rd in Legal & Public Safety sector. The DGGI 3.0 shows that District performed better in reducing frequency of road accidents, crime against women & children besides, achieving higher conviction rate.

District Bandipora ranked 1st in Environment Sector, while as, district Kupwara & Kishtwar secured 2nd & 3rd place respectively. These positions are based on performance of indicators like forest cover and water bodies and wet lands.

District Rajouri ranked 1st in Citizen Centric Governance Sector, while as Jammu & Samba got the rank of 2nd & 3rd. Noticeable performance of these Districts is witnessed in Grievance Redressal & conversion of Government offices to E-office which helped them in achieving top-ranking in this sector under DGGI 3.0.

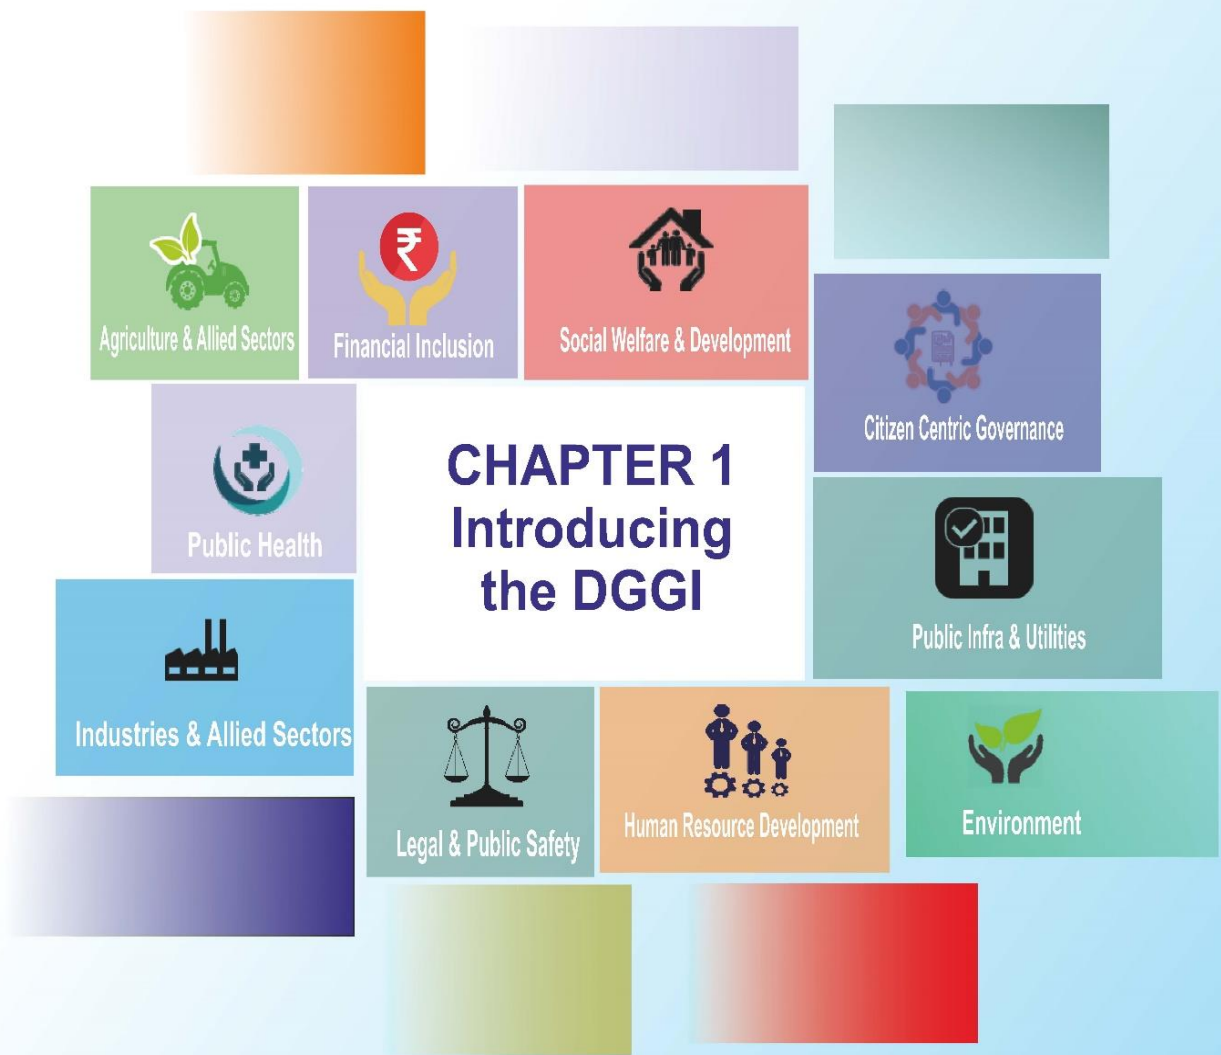

The DGGI 3.0 presents an insight of the district administration governance delivery mechanism and presents an avenue to gear up weaker areas and find innovative procedures & processes to bridge the gaps in targeted deliverables in a time bound manner. DGGI reports fosters healthy competition resulting in refinement of processes, innovation and finding avenues of hand holding which is ultimately beneficial to the society at large in establishing a vibrant and growing economy.

Way Ahead

Government is contemplating to have third party evaluation of DGGI in place for independent verification to enhance the credibility and robustness of index. Bringing in an external auditor onboard will strengthen the credibility of DGGI.

To make DGGI more inclusive and comprehensive, additional indicators are being considered depending on the availability and suitability of indicators across the districts.

The DGGI Portal/dashboard is a crucial tool for computing indices and assessing governance performance. The roadmap entails improving the monthly portal/dashboard to make it more comprehensive and relevant. The annual DGGI is also being linked to the monthly DGG portal for consistent monitoring by the District administration for improving public service delivery mechanism.

Chapter 1

INTRODUCING THE DGGI

Introduction

Good governance is the process of measuring the performance of the Government institutions in managing the public resources and ensuring the realization of civil, cultural, economic, social and political rights of the society in a transparent manner. It protects the interests of the people and emphasizes on public sector management, legal developmental framework, accountability and transparency.

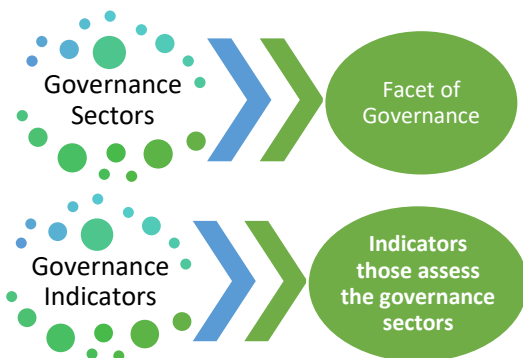

Good governance being the soul of public delivery system of a Government having measureable parameters through which it assesses the performance across various divisions/ units of an administrative setup over a period of time. District Good Governance Index (DGGI) is a comprehensive and implementable framework to assess the state of governance across the districts which enables ranking of Districts.

District is the primary unit of field administration under decentralized planning, engaged in implementation of various welfare programmes and projects for the well-being of the citizens. A proper measurement of the performance, therefore, becomes necessary to remain focused in delivering the services to the public which leads to holistic development of the administrative unit. Good governance initiatives are reflected over a period of time in people's participation, rule of law, transparency, responsiveness, consensus oriented, equity and Inclusiveness, effectiveness and efficiency, accountability, etc.

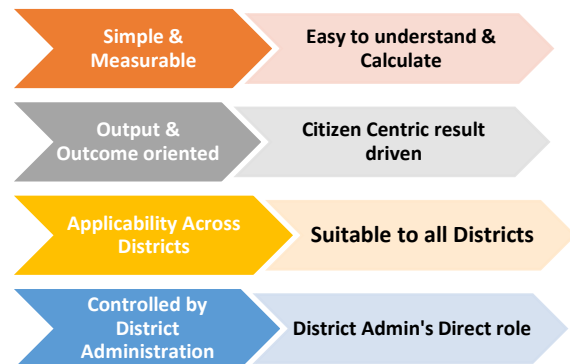

The main objective of assessing the performance of governance through District Good Governance Index (DGGI) in all 20 Districts of UT of Jammu and Kashmir based on identified sectors and indicators is to promote healthy competition and peer learning through best practices among the districts.

The present issue of DGGI 3.0 is third in the series which brings out comparative ranking of various Districts about Citizen Centric Governance and also generates healthy competition among districts. The DGGI 3.0 shall act as a reference document to the District Administration and other stake holders to bridge the gap in delivery of public good by identifying the low performers.

The components of the DGGI are:

The Principles of indicator Selection are:

DGGI 3.0 Methodology

20 districts of the UT have been ranked on the basis of data captured from the districts on 58 indicators under 10 sectors. The same methodology has been adopted for calculating sector and indicator-wise scores to arrive at final ranking of the districts as was done in DGGI 1.0 and 2.0.

The data on the identified sectors/ selected indicators has been obtained from the districts and has been scrutinized/ analyzed by the Directorate of Economics and Statistics and put to further calculation as per the decided methodology and formulas for the measurement of Good Governance Index.

- In some indicators, growth over the period has been measured while as others are target driven.
- The raw data has been normalized using Dimensional Index Method and subsequently used for ranking purpose after applying the respective weight-age assigned to the indicators.
- Sectors have been assigned equal weights across all sectors.
- Scores of selected indicators have been aggregated to arrive at the Sector Score and thereby arriving at a Sector Rank. Sector Scores are then aggregated for calculating the Composite District Score.

Computation of DGGI 3.0

Step I: Compilation of Necessary Data/ Information

Computation of scores for different indicators under 10 sectors prescribed in the DGGI Framework requires data on a large number of facets covering various aspects of governance at district level. The reference year used for growth-based indicators in the DGGI 1.0 and 2.0 has been kept intact. The data for this purpose has been collected from the District Development Commissioners.

Step II: Normalization of Indicator Values

Variables with mixed scales have been converted into dimensionless entities, so that they can be compared and used for ranking purpose easily, which is known as **normalization**. There are various methods available to normalize variables and attain scores for the Districts based on their performance on the identified indicators for compiling sector-wise/district-wise ranking. For the purpose of ranking the Districts as part of DGGI, the **Dimensional Index Methodology** has been used.

In this method, the normalized value of each indicator is obtained by subtracting the minimum value among the set from the raw value of indicators and then dividing it by the data range (maximum – minimum value). The maximum and minimum values for each indicator are ascertained based on the raw values for that indicator across the Districts – combining all Districts without considering the existing Divisional (Jammu and Kashmir Divisions) categorization. This approach is specifically adopted so that such calculation would permit comparison across all Districts and can also be used for generating overall ranks – without considering the categorization.

The following two equations have been used to normalise the indicator values:

Dimensional Score for Positive Indicators:

$$\text{Score} = \frac{(\text{Indicator Value} - \text{Minimum Value})}{(\text{Maximum Value} - \text{Minimum Value})}$$

Dimensional Score for Negative Indicators:

$$\text{Score} = \frac{(\text{Maximum Value} - \text{Indicator Value})}{(\text{Maximum Value} - \text{Minimum Value})}$$

Where

Positive Indicator = for which Higher Value is better

Negative Indicator = for which Lower Value is better

Indicator Value = Available through Secondary Sources

Maximum Value = Highest Indicator Value among the Districts

Minimum Value = Lowest Indicator Value among the Districts

The above-mentioned equations have been used directly by taking the values of indicators for reference year. In case of the growth-based indicators, this exercise has been undertaken after calculating Compound Annual Growth Rate (CAGR) over base year to reference year for each indicator. The following equation has been used for calculating CAGR:

$$\text{CAGR} = \left(\frac{\text{value of Reference Year}}{\text{value of Base Year}} \right)^{\left(\frac{1}{n}\right)-1} \times 100$$

where: n = number of periods

Step III: Assigning Weightages

a. Equal Weightage to Sectors:

As mentioned earlier, while conceptualizing DGGI, various aspects of governance, which are critical for growth, development and inclusiveness have been measured which have been clustered under ten sectors. All the identified ten sectors are facets of equal importance from the point of view of citizen-centric approach for such comprehensive index at District level.

b. Differential Weightages for Indicators:

Outcome / output-based indicators were given priority for indicator selection and at the same time selection was restricted due to availability of data. Therefore, the outcome / output-based indicators are assigned higher weightage whereas proxy indicators (input/process based) are assigned lower weightage. Assigning higher weightages to outcome/output-based indicators brings the focus on performance and achievements of the Districts.

Step IV: Computation of Scores and Ranking

After completing data normalization process, the normalized value of each indicator needs to be multiplied with weightage assigned to the indicator in order to obtain the final indicator score. These final individual indicator scores are aggregated to obtain a value for the sector. These aggregated values after multiplication with indicator weight becomes the score for the sector and once sector wise scores are aggregated, it becomes District's DGGI Score to be used for ranking purpose.

Limitations

Every statistical inference is bound to have accuracy to a limit, therefore, results cannot be 100% accurate and as per the expectations of the stake holders. However, every statistician tries to increase the level of accuracy and arrive at the most accurate results. It is also a fact, that while working on the indices, the hypothesis, selection of set of indicators and the methodology used determines the outcome of the study. If the hypothesis is subject to change, the results will automatically vary.

The results of this document (DGGI 3.0) is based on the methodology and set of indicators used in DGGI 1.0 and 2.0 which was vetted by Center for Good Governance, Hyderabad that primarily focuses on delta changes. However, the system is evolving and the directorate is open to make changes in the methodology as well as set of indicators with time based on the willingness of the departments concerned/ districts and availability of data from these sources.

Chapter 2

COMPOSITE DGGI 3.0 SCORE 2022-23

DGGI 3.0

• Top Performer : JAMMU

DGGI 2.0

• Top Performer : PULWAMA

DGGI 1.0

• Top Performer : JAMMU

Ranking with Final Score (UT)

Composite DGGI 3.0 score of 20 districts was computed at UT level by aggregating the scores of 10 sectors i.e i. Agriculture & Allied Sectors ii. Industries & Allied Sectors iii. Human Resource Development iv. Public Health v. Public Infrastructure & Utilities vi. Financial Inclusion vii. Social Welfare & Development viii. Legal & Public Safety ix. Environment x. Citizen Centric Governance.

District Jammu has secured rank first in the DGGI 2022-23 with an aggregate composite score of 6.377 while as District Samba and District Srinagar have secured second (6.180) and third rank (6.005) respectively.

District Jammu has topped in Public Infrastructure Sector while as District Samba has topped in Human Resource Development and Social Welfare Sectors. District Srinagar has secured ranked first in Industries & Allied Sector, District Rajouri in Public Health and Citizen Centric Governance. District Bandipora has topped in Environment sector while as District Anantnag in Legal & Public Safety and District Pulwama has secured rank first in Agriculture & Allied Sector and Financial Inclusion Sector.

Composite Ranking at UT level

S.No	DISTRICT	FINAL SCORE

Ranking of districts on annual basis has encouraged healthy competitiveness among the districts to perform better and improve public delivery system which resulted in overall improvement of service delivery, thereby leveraging them to make improvement in the areas where they are lagging behind. Every district has focused on various interventions for achieving the targets. However, based on the scores in 58 indicators. The top 3 high scoring districts and 3 low scoring districts are as under: -

J&K UT

Incremental change:

20 districts have been ranked from top to bottom on delta change (incremental change) in scores during financial year 2022-23. Anantnag district had a score of 4.484 under DGGI 2.0, which increased to 5.670 under DGGI 3.0, indicating a significant improvement of 1.186. Similarly, Jammu district witnessed an increase of 1.114 in its score from 5.263 to 6.377. Bandipora, Srinagar, and Rajouri districts also experienced positive change in their scores, with increase of 1.046, 0.94, and 0.844 respectively.

However, some districts witnessed a decrease in their scores as compared to DGGI 2.0. Pulwama district witnessed a decrease of 0.645, with its score dropping from 5.926 to 5.281. Kulgam, Shopian, and Doda districts also had negative change in their scores, indicating a decline in their comparative performance.

Chapter 3

Sector-wise Performance of Districts

The Good Governance Index 3.0 provides a comprehensive analysis of the governance performance in the UT of Jammu & Kashmir, specifically focusing on 20 districts. It assesses the performance of these districts across multiple sectors, offering valuable insights into their governance practices. The index encompasses 10 key sectors, namely Agriculture & Allied, Industries & Allied, Human Resource Development, Public Health, Public Infrastructure & Utilities, Financial Inclusion, Social Welfare & Development, Legal & Public Safety, Environment, and Citizen Centric Grievance. By evaluating the scores obtained in each sector and aggregating them, the index generates rankings that reflect the overall governance performance of the districts

Agriculture and Allied sectors encompass the governance aspects of the Primary sector covering agricultural horticulture and Livestock. Agriculture and Allied sectors play a vital role in the economy of UT of Jammu & Kashmir. The UT has a distinct geographical feature having two agro-climatic zones and each zone has its own particular climatic character that describes its cropping pattern, productivity, production etc. The agriculture sector in UT faces challenges on demand and supply fronts. The Government is contemplating to ensure doubling farmers income and reduce agrarian distress. Various initiatives are taken in order to improve the efficiency of this sector. To maintain parity and have a sense of cohesion an attempt has been made to follow proper sub-sector stratification while preparation and finalization of good governance index on the basis of selected indicators. Only generic indicators have been included. 11 indicators have been identified under this sector with a focus on output and institutional support like crop insurance, animal vaccination, kisan credit card, soil health card etc.

Industries & Allied Sector is a key to growth of the economy and it has a rippling effect with increase in employment. However, the government is giving much emphasis for Industrial development in the UT to boost the economy besides reducing unemployment. Despite numerous difficulties like lack of adequate basic infrastructure, difficult terrain etc, the Government is coming up with number of schemes for the development of Industries & Commerce and to boost the economy, Gross State Domestic Product and generate employment avenues in the UT of J&K. Union Government is laying emphasis on adoption of G2B model to promote industry and commerce. Most of the indicators for this particular sector are calculated at the UT level, therefore for the purpose of DGGI some proxy indicators such as establishment registered for Goods and Service Tax (GST), Micro, small and medium Enterprises (MSME) establishments, etc are included. Tourism, being an important economic and commercial activity of the J&K, an indicator pertaining to number of tourist visited has been also included. Combined together, these indicators would reflect the achievement of a particular District for promoting economic activities in the District. It is critical that the recent interventions of attracting good number of diverse industries now needs to be measured by way of indicators like growth in GST registered establishments, MSMEs and credit to handicrafts & allied sectors, self-employment etc.

Education plays a significant and remedial role in balancing the socio-economic fabric of the Country. Since citizens are its most valuable resource, needs the nurture and care in the form of basic education to achieve a better quality of life. This warrants an all-round development of our citizens, which can be achieved by building strong foundations in education. Quality school education is a function of a targeted focus on learning outcomes, efficient governance structures, provision of necessary infrastructure and ensuring equitable academic opportunities. The Government plays a crucial role in achieving education for all. In order to measure the governance of Human resource development, the indicators like enrollment ratio, retention rate gender parity and pupil teacher ratio(PTR) are included in compilation of the good governance index. The skill development indicator is also included to measure the readiness of the UT to meet the diverse skilled labour requirements of the emerging economy.

A direct consequence of a nation's poor health on its economy is through the adverse impact on its human capital. Health capital contributes more to wealth than other dimensions. Health sector is central to the well-being and progress of the nation, an employment generator, a productivity enhancer and a driver of innovation and entrepreneurship. Encouraging improvements have been recorded in the demographic and health status indicators of the Union Territory over a period of time. Under this sector, nine key indicators are measured looking at the outcomes like Maternal Mortality Ratio (MMR), Infant Mortality Rate (IMR), Immunization achievement etc. while J&K in general is above performing UT in terms of Health parameters such as MMR and IMR. Measuring the performance of these critical indicators and comparing between the Districts provides opportunity to design targeted intervention in lagging Districts. Overall operationalization and resources availability are also captured through indicator such as Health and Wellness Centers (HWCs), Anganwadis with own buildings etc. Similarly, other indicators in this sector like distribution of Ayushman Bharat Golden card, functioning of FRUs etc. are outcome of available infrastructure, right policies and streamlined processes.

The infrastructure facilities and utility services are crucial components of a well-functioning society, directly impacting the quality of life and overall development of communities. The Government has prioritized social overheads like housing, drinking water, sanitation, road connectivity and power supplies and all these parameters have been captured in this sector with the help of six selected indicators. The basic indicators include access to housing, water, road connectivity and availability and access to power supply.

Welfare of the citizens belonging to different sections of the society plays an important role in the overall development of the UT. Social welfare aims at providing services to the underprivileged section of the population by providing them various forms of social insurance against poverty, unemployment, disability, and old age. Social welfare programmes aim to create the basic conditions that will enable all members of the community to realize their potential for growth and self-fulfillment. The government is determined to provide benefits of various state and centrally sponsored welfare schemes to the underprivileged sections of the society.

Various initiatives are taken by the government in order to provide benefits to deprived sections of the society which include Atal Pension Yojana, National Social Assistance Programmes etc. In this sector, six indicators have been identified attempting to cover the overall gamut of the welfare and development arena. This sector covers the areas like social protection, Public Distribution System (PDS), employment, empowerment of poor, etc.

DGGI 1.0

• Top Performer: **GANDERBAL**

Financial inclusion is a process by which the individuals can avail banking and financial services. It aims to include everybody in society by giving them basic financial services regardless of their income or savings. It focuses on providing financial solutions to the economically underprivileged. The initiative aims to make the financial institutions to reach out to poor and low income individuals, as well as business with limited resources to boost the economy. The financial inclusion of poor and marginalized is assessed through various indicators included under this sector like financial inclusion under Jan Dhan Yojana, disbursement of Mudra Loan etc.

The Government is bound to provide protection to the citizens residing in its territory against threats to their wellbeing, survival and prosperity. The Judicial and Public Safety sector is critical as it reflects upon law and order situation and looks into efficiency of judicial processes, matters related to police, criminal justice, public safety, etc. Legal and public safety facilities are more than just places to hold judicial proceedings and keep communities safe. These facilities serve as landmarks and symbols of a community.

A healthy environment provides the basic necessities of life, like water, food and air. It also provides resources for economic growth and the means to fight natural hazards. Indicators linked to environment are evaluated to measure the success in minimizing negative externalities on the environment. Data describing environmental indicators can be spatially and temporally referenced to understand changes to the environment over space and time and are thus an important tool in facilitating environmental governance. Hence, good governance practices can effectively and efficiently bring out better environmental outcomes that ensure reduced levels of carbon dioxide emissions, adequate forest covers, and higher consumption of renewable energy vis-à-vis non-renewable energy. Realizing the criticality of environmental sustainability for sustainable development, environment has been taken as a separate sector. As depleting forest area is a main area of concern, the change in forest cover has been included as an indicator in the sector. The Indicator selection under this sector was particularly constrained due to limited availability of homogeneous data/ information across the districts. However, a beginning has been made through DGGI framework, which would be built-upon in subsequent editions of the Index.

• Top Performer: RAJOURI

DGGI 2.0

• Top Performer : SAMBA

DGGI 3.0

• Top Performer: JAMMU

The concepts of good governance and citizen centric administration are intimately connected. Citizen centricity with the aim of ensuring citizens' welfare and citizens' satisfaction, is critical for any government, which aims to provide good governance. The expectations of the citizens from the government are increasing with time which can be addressed through transparent, efficient and continuously evolving governance systems. The Government is making all efforts to improve service delivery through use of information technology, online portals, use of mobile applications, etc. This sector has included indicator which capture the status of grievances redressed, government services available online, conversion of government offices to e-office etc.

CHAPTER 4

Incremental Progress and Ranking

The ranking of districts for DGGI 3.0 (2022-23) is based on 58 indicators spread over 10 sectors by following the methodology as discussed earlier. The composite DGGI 3.0 score has been computed by aggregating the scores of 10 sectors i.e. Agriculture & Allied, Industries & Allied, Human Resource Development, Public Health, Public Infrastructure & Utilities, Financial Inclusion, Social Welfare & Development, Legal & Public Safety, Environment, and Citizen Centric Governance.

The primary objective of DGGI is to present the State of Governance in the districts and initiate healthy competition among the districts of the UT of Jammu & Kashmir. The end result is to improve citizen services and make governance at the district level more inclusive and accountable. To achieve this objective, a comparative analysis presented below depicts the change. From DGGI 3.0 (2022-23), it is evident that most of the districts have shown significant improvement and progress in various sectors and indicators compared to the previous index. The following table attempts to present the incremental change in scores between the financial years 2021-22 and 2022-23. Additionally, the sectors that have contributed to this change have been identified under the "Improved Sectors" column.

S. No.	Districts	DGGI 3.0 (2022-23)	DGGI 2.0 (2021-22)	Incremental Change	Improved Sectors
1	Anantnag	5.670	4.484	1.19 (26.5%)	<ul style="list-style-type: none"> • Agriculture and Allied • Industries and Commerce • Human Resource Development • Public Health • Public Infrastructure • Legal & Public Safety • Citizen Centric Governance

18	Shopian	4.945	5.379	-0.43 (-8.1%)	<ul style="list-style-type: none"> • Agriculture and Allied • Human Resource Development • Social Welfare & Development
19	Kulgam	4.639	5.114	-0.48 (-9.3%)	<ul style="list-style-type: none"> • Industries and Commerce • Environment • Citizen Centric Governance
20	Pulwama	5.281	5.926	-0.65 (-10.9%)	<ul style="list-style-type: none"> • Agriculture and Allied • Public Health • Financial Inclusion • Environment

In absolute scores, District Jammu with composite score of 6.377 tops the list of districts followed by Samba (6.180), Srinagar (6.005), Rajouri (5.870) and Bandipora (5.765). As is evident from the above table, the scores of 3 districts are in the scoring range of 6.0 (between 6.005 to 6.377). 8 districts are in the scoring bracket of 5 (ranging between 5.028 to 5.870). 9 districts are in the scoring bracket of 4 (ranging between 4.461 to 4.945).

District Anantnag has shown the highest incremental change of 26.5% in 2022-23 over 2021-22. This is followed by Bandipora with second highest incremental change of 22.2% while Jammu and Srinagar Districts have registered a percentage incremental change of 21.2% and 18.6% respectively. 14 districts have shown the incremental percentage change in 2022-23 while as 6 districts have declined in their growth over the previous index. However, all districts have shown improvement in performance in one or the other sectors of development as shown above, even if their composite scores have declined as compared to DGGI 2.0.

CHAPTER 5

Outcomes and Impact Assessment

Good governance is an important factor in promoting holistic development. Since the district is a basic unit of field administration and governance, it is crucial to measure the performance of districts in implementing various programs and innovative projects for the well-being of citizens. The District Good Governance Index (DGGI), an initiative of the UT of J&K, was introduced to measure the performance of districts across identified sectors and indicators of governance. This index has fostered competitiveness among districts in delivering the benefits of government programs and schemes to the targeted population.

Comparison between DGGI 2.0 and 3.0 reveals that several districts have shown remarkable improvement. Districts such as Jammu, Srinagar, Rajouri, Bandipora, and Anantnag have significantly enhanced their rankings.

District Anantnag, which was ranked 17th in DGGI 2.0, has now climbed to 6th place in DGGI 3.0. The district has excelled in sectors such as Agriculture, Industries, Human Resource Development, Public Health, Public Infrastructure, Judiciary, and Citizen Centric Governance. This indicates that the district administration has made tremendous efforts to improve performance in 7 out of 10 sectors. The targets set for these sectors have been satisfactorily achieved, leading to the successful implementation of schemes and benefits reaching the masses.

District Bandipora, previously ranked 13th in DGGI 2.0, has now secured the 5th position in DGGI 3.0. The district has made progress in the sectors of Agriculture, Financial Inclusion, and Environment. The targets set for these sectors have been satisfactorily achieved, resulting in the dissemination of scheme benefits to the masses.

District Rajouri has significantly improved its ranking from 10th to 4th by performing exceptionally well in the sectors of Public Infrastructure and Citizen Centric Governance. The implementation of interventions such as door-to-door garbage collection, solid and liquid waste management, and provision of dustbins has improved sanitation facilities in urban and rural areas. Moreover, the district has taken numerous initiatives in the Citizen Centric Governance sector, such as timely grievance redressal and the introduction of online services, for the convenience of the general public.

District Jammu, which was ranked 6th in DGGI 2.0, has achieved the 1st rank in DGGI 3.0. The district has made improvements in public health parameters, including institutional deliveries, full immunization, and Ayushman cards, through the organization of special camps and outreach programs. In the Social Welfare & Development sector, the district has topped the list by excelling in indicators such as Aadhar Card Seeding and Pension Schemes. Additionally, the district has witnessed growth in the Industrial & Allied sector by streamlining the registration process for MSME units and commercial establishments.

District Srinagar, previously ranked 9th in DGGI 2.0, has attained the 3rd rank in DGGI 3.0. The district has shown improvement in Financial Inclusion and Industries & Allied Sectors, securing the top position in both categories. The registration process for MSME units and commercial establishments has been streamlined by the district administration. Furthermore, the district has performed well in indicators related to Environment and Social Welfare, particularly in the preservation of water bodies and pension schemes.

The impact of DGGI can be observed on the ground, as districts compete with each other to secure top rankings. This can only be achieved when districts successfully meet their targets under the 10 identified sectors of governance, involving 58 indicators. The Sector wise details are given below:-

1. AGRICULTURE & ALLIED SECTOR

The agricultural landscape across different districts has showcased significant growth and positive trends in various sectors. When it comes to food grain production, nine districts have consistently displayed a positive Cumulative Annual Growth Rate (CAGR) from FY 2018-19 to FY 2022-23. Among them, Budgam and Pulwama have emerged as the front runners with an impressive CAGR of 8%. This growth signifies the Government's commitment to enhancing food grain production and ensuring a sustainable agricultural future.

In the domain of horticulture produce, 16 districts have made notable progress with a positive CAGR during the same period. Notably, Pulwama district has exhibited remarkable growth, leading the pack with a CAGR of 14%. This achievement underscores the district's favourable climatic conditions and agricultural practices that have contributed to the flourishing horticulture sector. The diversification of agricultural activities beyond traditional crops bodes well for the overall economic development of these districts.

The dairy industry has also experienced encouraging growth, with 9 districts showcasing a positive trend in milk production during FY 2022-23. District Jammu has emerged as the top performer in milk production, contributing 10.06% to the overall output. Following closely, Anantnag and Pulwama districts have also made substantial contributions with 9.63% and 9.50%, respectively. These numbers demonstrate the potential of these districts in the dairy sector and highlight the efforts taken to improve productivity and meet the growing demand for dairy products.

Furthermore, the livestock sector has witnessed positive developments as well. 17 districts have displayed a favorable CAGR in meat production with Kishtwar district leading the way with a remarkable CAGR of 8.82%. Similarly, in poultry production, 18 districts have experienced positive growth, with district Jammu boasting the highest CAGR of 27.34%. These advancements in livestock and poultry production contribute to the overall agricultural prosperity of the UT, supporting the livelihoods of farmers and boosting the economy.

2. INDUSTRIES & ALLIED SECTOR

The industrial sector in Jammu & Kashmir is considered a vital driver of economic activity and an effective solution to combat unemployment among educated youths. In recent years, significant efforts have been made to develop industrial infrastructure with the aim of attracting investments to the UT. This focus includes providing the necessary framework and support for industrial growth. The development of industrial infrastructure serves a dual role: facilitating industrial investments and contributing to overall development.

The fiscal year 2022-23 witnessed a significant increase in the number of establishments registered under the Goods and Services Tax (GST) in the UT of Jammu & Kashmir. Among the districts, Jammu stood out with the highest percentage of registrations, accounting for 25.72% of the total registrations. Srinagar and Anantnag followed closely behind; with 14.08% and 14.43% registrations respectively. This surge in GST registrations reflects a growing business landscape and economic activity in these districts.

The Micro, Small, and Medium Enterprises (MSME) sector also experienced notable growth in registrations under the Online Udyam platform during the same fiscal year. District Srinagar and Anantnag were at the forefront, contributing over 15% of the total MSME unit registrations. District Budgam accounted for 10.44% of the total registrations, showcasing a considerable presence of MSME units in these areas. This trend indicates the flourishing entrepreneurial spirit and the potential for job creation and economic development in these districts.

The Handicrafts sector in the UT of Jammu & Kashmir witnessed an increase in credit support during the fiscal year 2022-23. District Ganderbal emerged as the front-runner, experiencing a remarkable growth rate of 47.11% in the credit provided to the Handicrafts sector. On the other hand, District Reasi registered a modest increase of 0.33%. These numbers highlight the varying degrees of financial support to the Handicrafts industry in different districts, with Ganderbal demonstrating robust growth and Reasi showing a marginal increase. This indicates the importance of targeted interventions to boost the Handicrafts sector's development and economic impact across the UT.

3. HUMAN RESOURCE DEVELOPMENT SECTOR

The Human Resource Development sector plays a crucial role in driving socio-economic development and effective governance. It is widely recognized that a nation's human resources are its most valuable assets. Human Resource Development encompasses various aspects that

are vital for overall progress. These include promoting gender parity by ensuring equal opportunities and empowering women, enhancing skill capabilities through vocational training and up-skilling programs, providing adequate nutritional support for healthy development, improving retention rates within the territory, increasing literacy rates to foster a knowledgeable society, and ensuring equitable school enrollment ratios for marginalized communities such as scheduled castes and scheduled tribes.

Significant progress has been made in promoting gender parity across the districts. Out of the 20 districts, Baramulla deserves special recognition for achieving a perfect Gender Parity Index of 100%. Moreover, Jammu, Kathua, Kupwara, Kishtwar, and Udhampur have all surpassed a gender parity index of 82%, demonstrating substantial improvement in ensuring equal access to education for all.

Efforts to enhance the quality of education are also evident. A noteworthy accomplishment is the impressive retention rates observed in 12 districts, with Pulwama district leading the way with a flawless retention rate of 100% at the secondary level. Significant strides have been made in maintaining optimal pupil-teacher ratios, in 13 districts, the pupil-teacher ratio ranges from an excellent 1:12 to 1:15, ensuring students receive the necessary attention and support for their educational journey.

Infrastructure development and access to basic facilities have also received considerable attention. 5 districts have achieved 100% availability of drinking water, separate toilet facilities, and electricity, while as another 6 districts have achieved above 90%. However, there is still work to be done in the remaining 9 districts, where availability falls below 80%, with Udhampur district having the lowest availability rate at 41.18%.

Moreover, Jammu & Kashmir has recognized the significance of digital literacy by equipping schools with computer access. District Srinagar stands out with over 57% of schools having access to computers, enabling students to develop crucial technological skills. Furthermore, the UT has prioritized comprehensive skill training, with 12 districts successfully providing 100% training to all registered students, fostering holistic development.

These signifies that focused attention has been to the Human Resource Development of the UT. The focus on gender parity, retention rates, pupil-teacher ratios, infrastructure, digital literacy, and skill training demonstrates a commitment to providing quality education and promoting the overall well-being of the population. These efforts lay the foundation for a prosperous future for the UT.

4. PUBLIC HEALTH

Public health plays a pivotal role in driving development and ensuring the well-being of individuals within the Union Territory, as a significant portion of the population relies on the Government Health Care System to meet their healthcare needs. Recognizing the importance of healthcare, the government remains committed to shaping, strengthening, supporting, and sustaining the healthcare delivery system to provide every citizen with accessible, high-quality, and comprehensive health services.

The majority of districts have achieved impressive rates of full immunization coverage, with almost all districts reporting immunization rates of 100%. Only district Kupwara falls slightly below this mark with a immunization rate of 99.43%. This achievement reflects the successful implementation of vaccination programs and highlights the dedication of healthcare professionals and community outreach efforts.

Institutional delivery rates also demonstrate positive trends across the districts. 10 districts have accomplished 100% institutional deliveries, indicating the improved accessibility and availability of healthcare facilities for expectant mothers. Additionally, 5 other districts have achieved between 91% to 99% institutional deliveries, emphasizing the importance of proper medical care during childbirth and the need to continue efforts to increase institutional delivery rates further.

Overall, while certain areas still require targeted interventions to address specific health indicators, significant progress has been made in various aspects of healthcare across the districts. Continued efforts, including increased accessibility to healthcare services, improved infrastructure, and effective outreach programs, will be instrumental in further enhancing the overall health outcomes and ensuring the well-being of its residents.

5. PUBLIC INFRASTRUCTURE AND UTILITIES

Infrastructure facilities and utility services are crucial components of a well-functioning society, directly impacting the quality of life and overall development of communities. Recognizing their significance, the government has prioritized these sectors and ensured their efficient operation.

Significant progress has been made in various developmental initiatives across several districts in Jammu and Kashmir. Under the Pradhan Mantri Awas Yojana (PMAY), the housing for all scheme, Ramban, Jammu, and Srinagar districts have demonstrated exceptional performance, with Ramban leading the way by reaching a remarkable 99.25% completion of sanctioned houses. Additionally, 10 districts have achieved a commendable range of 70% to 89% progress in providing housing for all. This highlights the significant efforts and commitment towards ensuring adequate housing for the residents of these districts.

Moreover, the provision of safe drinking water has been a priority in Jammu and Kashmir. Notably, Ganderbal district has set a remarkable example by achieving 100% access to safe drinking water facilities for both its rural and urban households. Furthermore, 6 other districts viz. Srinagar, Jammu, Poonch, Samba, Reasi & Shopian have made substantial progress, ensuring safe drinking water access to over 70% of their population. These accomplishments underscore the commitment towards improving the quality of life and addressing essential needs of the people in

these districts.

The focus on sanitation and electrification has yielded positive results in several districts of Jammu and Kashmir. An impressive number of eleven districts have achieved an outstanding 99% to 100% access to sanitation facilities, while 8 other districts have attained a commendable range of 94% to 99.50%. This signifies the efforts taken to enhance sanitation facilities, promoting better hygiene practices and ensuring a healthier environment for the residents.

In terms of electrification, 10 districts have successfully achieved the target of electrifying 100% of households. Additionally, 4 districts are on the verge of accomplishing this milestone, while the remaining districts have shown significant improvement in household electrification. This progress in electrification initiatives reflects the commitment to providing a reliable and efficient power supply to all households in the UT.

Furthermore, the development of all-weather roads has been a key priority under the Pradhan Mantri Gram Sadak Yojana (PMGSY). Districts of Jammu, Rajouri, and Samba, have achieved 100% target, showcasing their efforts to improve connectivity and accessibility. Moreover, ten other districts have made substantial progress, with over 80% completion of the total sanctioned kilometers of all-weather roads. Notably, Kupwara district stands out for achieving 100% conversion of roads to black top roads, demonstrating their commitment to enhancing infrastructure and ensuring smoother transportation networks.

Overall, these accomplishments in housing, safe drinking water, sanitation, electrification, and road infrastructure highlight the substantial progress made in improving the quality of life and overall development in various districts of Jammu and Kashmir.

6. SOCIAL WELFARE AND DEVELOPMENT

Social development is a critical aspect of any society and ensuring the welfare of its citizens, particularly those who are neglected and downtrodden, forms the core of this development. Social

welfare programs play a vital role in targeting and assisting vulnerable individuals, preventing them from succumbing to hunger, poverty, and other adversities. These programmes aim to bridge the gap and provide equal opportunities to those who are less privileged in society.

All the districts have successfully accomplished the goal of Aadhaar seeding for ration cards, reaching an impressive 100% coverage. With this milestone, the government aims to enhance transparency and eliminate any possibility of duplication or fraud in the public distribution system, ensuring that the benefits of subsidized food grains reach the intended beneficiaries without any obstacles.

Off-take of Grains - A total of 13 districts have demonstrated exemplary performance by uplifting the entirety of sanctioned food grains under TPDS and SSS, while the remaining seven districts have achieved over 90% off-take of food grains. This remarkable accomplishment reflects the effective implementation of distribution mechanisms, ensuring a steady flow of food grains to the designated distribution centers and subsequently to the households in need. The government's focus on improving the off-take of grains aims to address food security concerns and alleviate hunger, ensuring that the allocated food grains are efficiently utilized to meet the nutritional requirements of the population.

7. FINANCIAL INCLUSION

Financial Inclusion facilitates individuals and businesses gaining access to suitable, affordable, and prompt financial products and services.

The evaluation of financial inclusion for the poor and marginalized relies on diverse indicators, including metrics like the Jan Dhan Yojana program's impact on financial inclusion and the disbursement of Mudra Loans, among others.

Financial inclusion under the Jan Dhan Yojana has seen varying degrees of success, with only eight districts managing to open Jan Dhan accounts for more than 50% of eligible beneficiaries. In terms of the total disbursement of Mudra loans per one lakh population, Pulwama and Ganderbal districts have emerged as the frontrunners, providing the highest financial support under the Mudra scheme.

When it comes to the disbursement of funds for self-employment schemes, most districts have demonstrated a positive trend, except for Shopian and Doda. Notably, Srinagar district has recorded the highest compound annual growth rate (CAGR) of 212.76% in offering financial assistance under the self-employment scheme.

8. LEGAL AND PUBLIC SAFETY

Public safety is the first and the foremost duty of the Government to ensure the effectiveness of laws and regulations in promoting justice and protecting individual rights.

In the fiscal year 2022-23, the number of road accidents per one lakh population varied across districts. Kupwara district reported the lowest road accidents, with 14.25 accidents per one lakh

population, while Samba district had the highest number of accidents, with 114.14 accidents per one lakh population.

When it comes to crimes against women, Kathua district reported the minimum incidence, with 26.04 crimes per one lakh women population, whereas Ganderbal district had the highest incidence, with 215.28 crimes against women per one lakh population. In terms of crimes against children, Shopian district reported no crimes against its child population, while Samba district had the highest incidence, with 33.18 crimes per one lakh child population. Regarding conviction rates, 7 districts achieved a rate of over 68%, with Udhampur district registering the highest conviction rate of 88% for the fiscal year 2022-23.

9. ENVIRONMENT

Preserving environment is not an option, it is an imperative and for that matter collective & individual efforts are required to protect the forest and reduce the pollution, promote sustainable resources management and engage in conservation efforts. Among other things extension of forest cover is one of the pillar to have a sustainable and environmentally conscious future. Over the past two years, there has been a positive change in forest cover in 7

districts. These districts have witnessed an increase in their forested areas, highlighting efforts towards conservation and afforestation. Additionally, 4 districts, namely Srinagar, Shopian, Kishtwar, and Rajouri, have achieved full protection of their water bodies and wetlands. These districts have implemented measures to safeguard and preserve these valuable natural resources, ensuring their long-term sustainability.

10. CITIZEN CENTRIC GOVERNANCE

Government of Jammu & Kashmir is committed to provide ease to its citizens by providing "online services", "timely grievances redressal" & "conversion of Government Offices into e-Offices" to promote transparency, efficiency & Stability in the Governance System. By embracing technology and leveraging digital tools to streamline operations, enhance productivity and create more flexible work environments. This level of connectivity fosters teamwork and empowers employees to work effectively, irrespective of geographical barriers.

Over the past two years about 50% Government offices have been converted into e-Offices in the Union Territory of Jammu & Kashmir, which has increased the government working manifolds. In terms of grievance redressal, District Rajouri stands out as the only district to achieve a 100% grievance redressal percentage. 18 districts fall within the range of 91-99% grievance redressal, while Reasi district lags behind with a percentage of 79.46%. Regarding the provision of government services to citizens online, 2 districts, namely Srinagar and Doda, have successfully transitioned to providing 100% of government services online. 12 districts have achieved a range of 70% to 99% online service delivery.

There has been significant progress in converting government offices to e-offices, with approximately 41% of offices having completed the transition. This shift towards e-offices enhances efficiency and accessibility in administrative processes.

Chapter 6

WAY AHEAD

DGGI and Innovativeness: Fostering Good Governance

Good Governance is characterized by transparency, responsibility, accountability, participation, and responsiveness to the needs of the people. It necessitates the efficient utilization of all available resources - human, physical, and technological - in order to develop mechanisms that align goals, allocate resources, and empower decision-making authority for innovation across the District Administration, in line with the aspirations of the general public. Administrations that embody Good Governance are capable of effectively dealing with any situation, even with limited resources.

The effective functioning of governance is a primary concern for every citizen. Citizens are willing to pay for quality services offered by the government, but what is crucial is a transparent, accountable, and comprehensible governance system that is free from biases and prejudices. There is a pressing need to introduce innovativeness within the governance system to prioritize the Gandhian principle of 'Antyodaya,' which aims at restoring good governance. Efforts should also be directed towards instilling integrity in governance, thereby enhancing its ethical foundation. Good Governance will continue to be a crucial requirement for the ongoing and future reforms.

New approach to measure Good Governance

In an era marked by faster technological advancements and application of modern statistical tools, the traditional governance approaches are not sufficient to capture dynamic nature of governance. Recognizing the challenge, Government of Jammu & Kashmir switched over to the innovative method of District Good Governance Index and with all out-efforts of Jammu & Kashmir Administration, the District Good Governance Index which is the first of its kind in any state/UT in the country was launched in 2021-22 and subsequently dedicated portal to capture the data on the identified 10 sectors and 58 indicators of development was launched in January, 2022 as well.

Accountability & Transparency

To ensure transparency and accountability, Good Governance Index has influenced the policy makers, District Administration and all the stake holders involved in the development of the administrative unit by creating a strong sense of accountability. The indices judged with the tool of a DGGI provided a systematic and standard frame work for evaluating the performances of district level implementing agencies responsible for the development of the particular sector. It also includes improvisation of existing Govt. interventions where stakeholders and administrators are made more responsible for their duties regarding optimal use of resources and able to deliver the services to the public efficiently. It has also created awareness in the public to comprehend and asses the performance of the government.

Release of DGGI Index (1.0, 2.0 & 3.0)

With the successful release of three editions of DGGI, it is has become the most innovative tool for the district administration and other stakeholders to work on weak areas and bridge the gaps. The index encourages districts to adopt creative and innovative approaches to governance challenges on persistent basis, besides conducting periodic reviews and monitoring

to judge the levels of the development that helps them to identify areas for improvement and their corrective measures.

Benefits of Adopting DGGI

DGGI gives the complete insight on major sectors like Agriculture and Allied Industries and Allied Sectors, Human development, Public health, Public utility & infrastructure, Social welfare, financial inclusion, Legal & Public Safety, Environment and Citizen Centric Governance, having direct impact on the common masses. A distinguished feature of the Good Governance initiative is its emphasis on citizen centric approach, recognizing them as the key stakeholders in governance, therefore through online platforms citizens can voice their issues and provide feedback which contributes to the assessment of the Governance. Apart from other sectors, DGGI is also measured on citizen centric Governance which includes Grievance redressal, online services provided under public Guarantee act and conversion of Govt. offices to e-offices. All the districts are showing increasing trend over past few years.

Leveraging Technology for Data collection and Analysis

To measure the DGGI modern tools of technology has been put in place and large data is being collected on the specified indicators on online portal on every month which enhances the accuracy, speed and objective of governance assessment and improves the quality of data by its scrutiny at various levels.

With the launch of portal and documentation of the DGGI index, that presents the governance assessment findings in a user-friendly manner and makes the complex governance data easier to understand to policy makers, administrators and other stakeholders and promotes data-driven-decision making and governance reform processes

Public awareness

Govt. Schemes and programmes are instrumental in addressing societal challenges, promoting Development and improving the wellbeing of its citizens. Monitoring and assessing the effective implementation of these programmes is crucial for assessing the progress. With the continual publication of DGGI now third in series created awareness amongst public, policy makers and administrators equally about the understanding the better governance practices. Helps the Govt to gauge the effectiveness of the schemes and identify areas where course of corrective measures or enhancements are required in plugging the loopholes impeding to achieve their objectives, targets and milestones within a specified period.

Positive impact /Creating Sense of Competition

District Good Governance Index (DGGI) has produced sense of competition amongst the Districts, as it has been observed from the past few years after the introduction of DGGI, Districts Administration make more efforts to improve their rankings and focus on improving public service delivery, promoting innovations and strengthening institutional capacities. The index incentivizes district administration and all the stakeholders about the improvisation of the Governance which ultimately benefits population. The index also facilitates the sharing of best practices among the districts, creating a collaborative environment through which successful practices in the implementation of various programme are being replicated and adopted.

Public perception and confidence

DGGI rankings definitely influence public perception and confidence in district authorities, as high rankings indicate efficient and transparent governance practices, thereby generating positives of the authorities at the helm of affairs among citizens. This will yield more positive

results as the public confidence grows, public is more likely to work with district administration in resolving issues impeding the developmental process.

Way Ahead

Building good governance relies on the quality of organization and personal interest and ability to provide strong leadership to steer the initiatives for the welfare of general masses. Administrative capacity plays a pivotal role in delivering essential services to the public, fostering economic progress, and promoting social cohesion. Proficient system clubbed with transparent mechanism play its own role in effective delivery mechanism. This needs to be clubbed with sustainable and long lasting benefits of the society in the long run.

The targets of Amrit Kaal are closely intertwined with the universal goals of Sustainable Development Goals (SDGs) set forth by the United Nations Development Programme (UNDP). SDG 16 encapsulates the essence of "good governance." Therefore, establishing good governance systems that deliver effectively calls for the adoption and integration of innovative ideas.

By embracing innovativeness in governance, we can further advance the principles of Good Governance, ensure sustainable development, and meet the evolving needs of our society.

Enhancing Scope of DGGI

There is always scope for further improvement in any initiative. The department intends to enhance its scope and utility to make it more broad based and inclusive by including additional indicators, depending upon the availability and suitability of indicators across the districts.

Third-Party Evaluation

The Jammu & Kashmir Good Governance Index represents the next generation Administrative Reforms in bench marking governance at district level and helps to identify the impact of various governance interventions at district level and provide a futuristic road map for improving district level governance. The impact of Good Governance index rankings of districts is far-reaching and transformative and influence policy formulation, resource allocation, public perception and development outcomes. These rankings serve as a road map for governance improvement and motivate district administration to implement reforms to strengthen public confidence. With the introduction of GGI rankings it has been observed that districts strive to improve their rankings thereby focusing on the developmental sectors.

To further enhance the performance of the DGGI program and ensure better service delivery at the ground level Planning Development & Monitoring Department is contemplating as a way forward to have a third-party mechanism in place for independent verification to enhance the credibility and robustness of index. By incorporating the third-party intervention an exercise has been initiated in this regard.

Improvisation of DGG Portal/Dashboard

The DGGI Portal/dashboard is a crucial tool for computing indices and assessing governance performance. The roadmap entails improving the monthly portal/dashboard to make it more comprehensive and relevant. One approach is to explore the possibility of linking the DGG dashboard with other portals or platforms that offer related data and information. This integration would enhance the richness and accuracy of the indices calculated through DGGI. Secondly, the annual DGGI is also being linked to the monthly DGG portal for consistent monitoring by the District administration for improving public service delivery mechanism.

1. DISTRICT JAMMU

SCORE: 6.377

DGGI 3.0

• RANK 1

DGGI 2.0

• RANK 6

DGGI 1.0

• RANK 1

District Jammu derives its name from the City of Jammu which caters as winter Capital of Jammu and Kashmir, UT and falls under Category 'B'. The City of Jammu is also known as City of Temples. Raja Jamboo Lochan is believed to have founded this city in fourteen century B.C. On witnessing an extraordinary phenomenon of a tiger and a goat drinking water from one and the same pond he decided to build a city "Jamboo" at this site so that the strong and weak could live together in peace and mutual tolerance.

It is located 74 degree 24' and 75 degree 18', East longitude and 32 degree 50' and 33 degree 30' North latitude. It is approximately 600 kms away from the National Capital, New Delhi. Jammu district is spread over an area 2342 sq. kms and has a population of about 15.29 lakhs. It is the largest populated district of the UT. The District Jammu comprises of 21 Tehsils, 20 CD Blocks and 305 Panchayats with 915 revenue villages.

The No. of Males and Females in the District is of the order of 8.13 lacs and 7.16 lacs respectively and the sex ratio of the district is 880.

The population density per sq km in the district is 653 which is the highest in the Union Territory.

• RANK 3

District Samba was made operational in the year 2007 deriving its name from the Samba town which is situated on range of Shivalik Hills alongside the National Highway on the bank of River Basanter at a distance of 40 KM from Jammu City. It is located at an altitude of 384 meters above sea level. The district Samba is bounded by District Udhampur in the North, by Kathua in the East, District Jammu in the West, while on the southern side, it has International Border with Pakistan. The climate of the district is sub tropical. The temperature ranges between 6°C to 47°C. Industrial Sector, Agriculture and allied sectors, tourism etc play significant roles in the economy of the district.

Samba is well known for being Treasure House of Ancient Monuments. There are numerous forts with historical significance, including Mohargarh Fort, Dhergarh Fort, Bupnergarh Fort and Samba Fort.

Samba is also famous in traditional Calico Printing where local made dyes are used for printing weaved cotton fabrics. District Samba has been divided into 6 Tehsils, 9 Blocks with 101 Panchayats and 382 revenue villages. Besides there are 4 Municipalities.

District Srinagar is the summer capital of Jammu and Kashmir (UT). It is situated in the centre of the Kashmir Valley on the banks of the **River Jhelum** and is surrounded by four Districts. The capital city of Srinagar is located 1585 meters above sea level. The city is famous for its gardens, lakes, houseboats and religious places (Temples & Shrines). It is also known for traditional Kashmiri Handicrafts and Dried Fruits. The city is located on both the sides of the Jhelum River, which is called **Vyath** in Kashmir. The river passes through the city and meanders through the valley.

Administratively District Srinagar is divided into 7 Tehsils, 4 CD Blocks with 21 Panchayats and 137 revenue villages. Besides there is Srinagar Municipal Corporation for City of Srinagar.

A wetland namely *Hokersar* is situated near Srinagar. Thousands of migratory birds come to *Hokersar* from Siberia and other regions in the winter season. Migratory birds from Siberia and Central Asia use wetlands in Kashmir as their transitory camps between September, October and again around spring. These wetlands play a vital role in sustaining a large population of wintering, staging and breeding birds.

District Bandipora was carved out of erstwhile District Baramulla in 2007. It is located on the Northern Banks of Wullar---the Largest Fresh Water Lake in Asia. The District is bounded by District Ladakh in the East, District Srinagar in the South, District Kupwara in North West and District Baramulla in the West. The majority of the population lives in rural areas and speaks Kashmiri. The vital Kishinganga Hydro Electric Project is in District Bandipora. The topography of the District represents a mix of beautiful mountains and streams offering tremendous potential for development of Scenic and Adventure Tourism. Wular lake and picturesque Gurez valley are main tourist attractions. Bandipora is known for Trekking, Mountaineering and Fishing. The major source of income of the people is Agriculture, Horticulture, Fishing, Animal Husbandry, Sheep Husbandry and small-scale industries/units etc.

DGGI 1.0

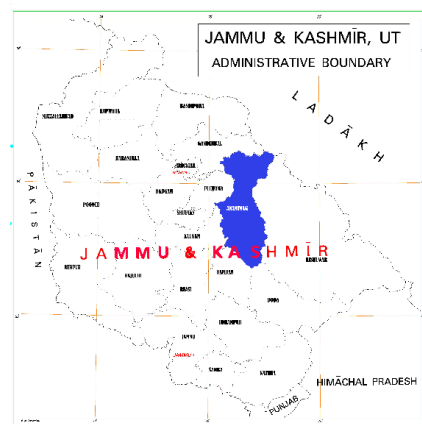

• RANK 6

Anantnag District Gateway of Kashmir valley, is located in the southern part of the Jhelum River basin and located at the centre of the Union territory. It is oldest District of the J&K. The district consists of 385 inhabited and 10 un-inhabited revenue villages. Besides, there is one Municipal Council and 09 Municipal Committees in the district. The district consists of 12 Tehsils and 16 CD blocks. The population of the district, as per census 2011, is 10,78,692 souls, comprising of 153640 households, with a gender distribution of 5,59,767 males and 5,18,925 females and the district has 927 females against 1000 males while as it is 1000:889 at the state level. The Rural, Urban constitution of the populations stands in the ratio of 74:26 as against 73:27 for the state.

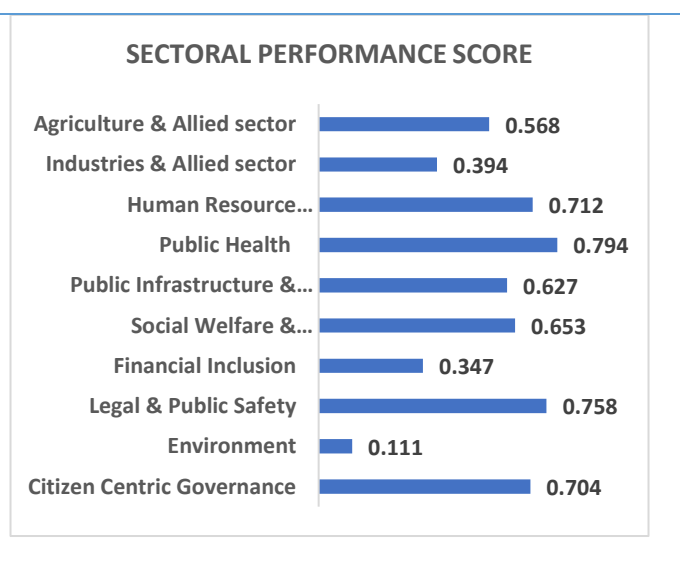

Due to proximity of Peer Panchal Range, which stretches in its South and South-East, the district has a more temperate climate in summer and relatively cold in winter than other districts of the valley. The rainfall is generally excessive in spring, moderate in summer, deficient in autumn and the district receives snowfall during the winter season.

The district is also known for world famous Shri Amarnathji Cave, situated in the upper reaches. Every year thousands of devotees pay their homage at the Holy Cave generating income avenues for local populace.

The district has also the distinction of having some health resorts figuring on the Tourist Map viz. Pahalgam, Kokernag, Verinag, Achabal & Daksum. These health resorts attract not only the domestic but a significant number of foreign tourists. The district is also famous for ancient heritage and religious sites.

District Doda derives its name after Doda town headquartering the District Administration. The District is bounded by Kishtwar District in the North and North-East Himachal Pradesh, Kathua District in the South, Udhampur District in the South-West, Ramban in the West and Anantnag in the North-West. Doda town served as the winter capital of historical Kishtwar state.

Agriculture is the main stay of economy of the District, tourism and mineral extraction also contribute to the economy. Bhandarwah is a place famously known as Chota Kashmir located in the district and is the main attraction to tourists in the district. Mineral resources such as lead, mica and gypsum are extracted in the district. Administratively district Doda is divided into 17 Tehsils, 17 CD Blocks with 237 Halqa Panchayats and 400 revenue villages.

10. DISTRICT GANDERBAL

SCORE: 5.259

DGGI 3.0

• RANK 10

DGGI 2.0

• RANK 8

DGGI 1.0

• RANK 10

The Ganderbal town is the District Headquarter and has derived its name from a famous spring Ganderbhavan with the passage of time, the name got changed into Ganderbal. Historically, Ganderbal acted as gateway to the Central Asia by constituting one of the most important station of the erstwhile Silk-Route.

The District Ganderbal is located between 34.23° N Latitude and 74.78° E Longitude on the North of District Srinagar from which it was carved out in 2007. It mostly stretches from south – west to North-east with a length of 125 kms and this stretch has a width of around 10-20 kms at an elevation of 1650 to 3000 meters above the Mean Sea Level (MSL). Nearly 70% area of the District is hilly and semi-hilly.

Administratively, the District Ganderbal is divided into 6 Tehsils, 7 CD Blocks with 126 Panchayats and 139 revenue villages. River Sindh traverses a course of about 100 kms through the District with a basin exceeding 1556 Sq kms. The district covers the entire water shed of the river so the Sindh valley and the District has become synonymous.

The District Ganderbal holds some of the sacred pilgrimage sites like serene spring of famous Shri Mata Kherbhawani Durga Temple and Qamar Sahib and Baba Hyder(RA) Tullamula. An easy approach through Baltal to Shri Amarnathji cave has made the District World renowned. With the presence of tourist resort Sonamarg and Mansbal lake on its fringes and Sindh stream adding its importance & charm can contribute to the emergence of this area both as religious tourist destinations and recreational activities.

12. DISTRICT SHOPIAN

SCORE 4.945

DGGI 3.0

• RANK 12

DGGI 2.0

• RANK 4

DGGI 1.0

• RANK 18

District Shopian came into existence administratively in April-2007. It has been carved out of erstwhile District Pulwama. Shopian district is located in the southern part of Kashmir Valley and bounded by Pulwama, Kulgam, Anantnag Districts. Shopian is a hill District and the historical road known as Mughal Road passes through the District.

Peer Ki Gali is a Tourist Destination where temperature often drops to as low as -7° c in winter, which is one of the extremely coldest place of Jammu and Kashmir.

Most of its area is occupies by forests and covered by orchards especially apple and walnut which contribute to the economy of the district particularly of its rural community. The economy of the District depends on agriculture and horticulture, particularly apple.

District Shopian is administratively divided into 7 Tehsils, 9 CD Blocks with 98 Halqa Panchayats and 239 revenue villages.

The Kripal Mochan Mandir and Jamia Masjid Shopian are famous religious tourist attraction places.

District Udhampur is situated in the southern part of the Jammu & Kashmir UT and is bounded on the West by Reasi District, in the North by Ramban, in the North-East by Doda District, in South-West by Samba & Kathua Districts and in the South-West by Jammu District. The Headquarter of Northern Command is also situated in the District. Most of the population is engaged in agriculture and its allied sectors and the district is also rich in forest wealth. Due to multitude of shrines and temples, Udhampur is also known as Devika Nagari meaning City of the Goddess. Heritage sites such as Ramnagar Fort, Sheesh Mahal, and many others are source of attraction in the District. Besides many tourist places such as Patnitop, Nathatop, Panchari, Mansar Lake, Duddu-Basantgarh attracts lakhs of tourists every year. Dr. Shayama Parshad Mukerji Tunnel is one of the longest tunnels with a length of about 9.0 Kms with fully integrated tunnel control system and starts from Chanani area of district Udhampur. Dogri is the main language of the people besides Pahari and Gojri are other languages spoken in some areas of the District. The district is also famous for its cuisines such as Kaladi, Kulthein di Dal, Rajmash and Ambal.

District Kupwara has been carved out of erstwhile Baramulla District in the year 1979. The geographical area of the District is 2379 sq.kms out of which forest area being reported as 1534.52 sqkm. The average temperature is ranging from -10 degree Celsius to 37 degree Celcius. The District is situated at an altitude of 5300 ft. above sea level. In the east and south, there are district boundaries of Baramulla and in the west line of control(LOC) separating it from POJK. It is about 97 Kms from Srinagar (Summer Capital of J&K UT) and well connected through road network. There are some famous passes of Himalayan range like Sadhna Top (Nastachen Gali) connecting Karnah Sub Division with District HQ and others like Tootmar Gali, Farkiyani Gali and Zamindar Gali connecting Leepa valley(POK), Keran and Machil areas with Kupwara District. The Kishan Ganga River, a major river other than Jhelum passing through the district.

Kupwara district is surrounded by thick forests, mountain slopes and snow-clad peaks from three sides. The district is dotted by magnificent and breathtaking natural beauty and has a great potential of tourist traffic. The district is famous for beautiful tourist places viz, Bungus Valley, Lolab Valley, Drangyar, Teetwal, Keran and Machil valley & other health resorts, famous in eco-tourism, adventure-tourism and border-tourism because of its natural scenery, climate and topography. Administratively, District Kupwara is divided into 16 Tehsils, 24 CD Blocks with 385 Halqa Panchayats and 379 revenue villages. Agriculture is the main source of livelihood in Kupwara. It is also rich in forest.

District Kulgam came into existence as a separate district in the year 2007. The District Head quarter is at a distance of 70 KMs from the summer capital Srinagar and shares its boundaries with District Shopian, Pulwama, Anantnag and Peer- Panjal Range of Ramban District. Geographically, the district lies between 30° -15' North Latitude and 74° -35' East Longitude. Besides places of spiritual interest viz. Mir Syed Hussain Simnania (RA) at Kulgam, Sheikhul Alam (RA) at Kund, Sheikh Noor-udin-Wali (RA) at Chimmer, the district has tourists places like: "Aharbal Water Fall" on veshow nallaha which is a place of sight-seeing in extreme South-West of Kulgam. "Kung-Wattan and Gurwatan" ahead of Aherbal; Cheranbal and Nandmarg , highland pastures are also places to visit by the tourists. Apart from meadows in the areas of Kund to Aherbal Clefts the district has natural and fresh water resources in shape of various famous springs such as Kousarnag (ahead of Aharbal), Waseknag (Kund) etc

18. DISTRICT RAMBAN

SCORE : 4.635

DGGI 3.0

• RANK 18

DGGI 2.0

• RANK 18

DGGI 1.0

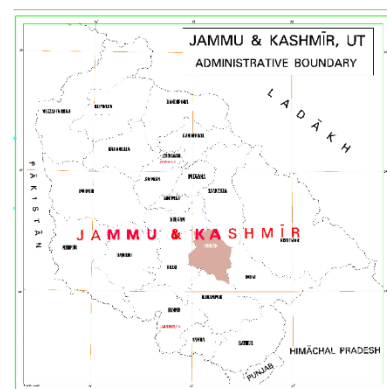

• RANK 16

District Ramban is located in the lap of Pir-Panjal Mountains. Ramban contains numerous Valleys created by the River Chenab along with its several tributaries. The district has an average elevation of 3792 ft. above mean sea level (MSL) and is flanked by beautiful tourist spots. Ramban shares its boundary with Reasi, Udhampur, Doda, Anantnag and Kulgam districts. It is also a gateway to the valley of Kashmir.

District Ramban comprises of 8 Tehsils, 11 CD Blocks with 143 Halqa Panchayats and 172 revenue villages.

Ramban is on the cusp of glory after completion of two prestigious National Projects – Udhampur-Srinagar-Baramulla Rail Link (USBRL) & Four-Laning of Jammu-Srinagar National Highway (now NH-44) Projects. These National Projects shall annihilate distances and elevate Ramban's strategic position as the most ideally located districts in J&K UT, where almost all the Divisions and majority of the districts are equidistant. It has a major hydroelectric project known as Baglihar Dam. Agriculture, Horticulture and Tourism industries play a significant role in income generation. With agriculture and allied sectors remaining the core sectors of development, Ramban envisages itself towards saturating various Government Schemes and benchmark practices to increase volume and penetrate newer markets for its products with 'organic' being its key Unique Selling Proposition (USP).

The climate of the District varies according to the altitude. The temperature increases as high as 42°C during summer in the low-lying areas and decreases to 1.5°C in the high-altitude areas during winter.

Poonch, an erstwhile princely District is located in the foothills of Pir-panjal range. It is also known as Mini Kashmir due to its scenic beauty and it has lot of similarities with respect to natural beauty, climatic condition and geography aspects with Kashmir. It has sky kissing mountains, snow peaks, beautiful valley, lush green pastures, gushing streams, crystal clear lakes and waterfalls. Poonch is blessed to have perennial rivers, small streams and small ponds across the district. The district is also blessed with picturesque landscape surrounded by Pir Panjal range. Scope of development is huge in this region especially in tourism, infrastructure and connectivity.

District is bounded by Baramulla, Budgam and Shopian District of Kashmir Valley in the North-East, by the Rajouri in the south. Poonch is as distance of 250 Kms from Jammu.

Poonch is multi cultured, multi religious in nature having diversified population. Poonch is having rich culture, customs and traditions.

District mainly depends on agriculture and allied activities as source of income and some small-scale industries such as Steel Fabrication, Wooden and Food Processing unit based industries are another set of economic activities.

District Reasi has been carved out of District Udhampur in 2007.

The District is situated between a longitude of 33.0804° North and at a latitude of 74.8365° East. It is surrounded by District Udhampur on the eastern, District Ramban on northern eastern fringes, District Rajouri on its western & north western ends, District Jammu on its southern ends & a part of the District also touches District Shopian on Northern fringes. As per Census 2011, the population of the District is 3,14,667 persons comprising of 1,66,461 males (52.90 %) and 1,48,206 female population (47.10 %) with sex ratio of 890 females per 1000 males. The District is divided into 9 Tehsils, 12 CD Blocks with 153 Halqa Panchayats & 259 revenue villages. The total area of the district is about 1719 sq. km with a population density of 183 person per sq. km.

The primary occupation of the people is Agriculture & allied activities. A large number of religious tourists from all over the country and overseas pay their obeisance at shrines of Mata Vaishno Devi ji and Shiv Khori located in the district. The Salal Hydro Electric Power Project on river Chenab has been constructed in District Reasi.

BASIC PROFILE		SECTORAL PERFORMANCE SCORES	
Area (Sq.Km)	1719	Agriculture & Allied sector	0.268
Population (No.)	314667	Industries & Allied sector	0.084
Urban Population (%)	8.58	Human Resource Development	0.499
Rural Population (%)	91.42	Public Health	0.821
Density (Persons Per Sq.Km)	183	Public Infrastructure & Utilities	0.407
Literacy Rate (%)	58.15	Social Welfare & Development	0.706
Sex ratio (Per 1000 males)	890	Financial Inclusion	0.491
Tehsils (No.)	9	Legal & Public Safety	0.526
CD Blocks (No.)	12	Environment	0.432
Municipalities (No.)	2	Citizen Centric Governance	0.227
Panchayats (No.)	153		
Revenue Villages (No.)	259		
Forest Cover area (Sq.Km)	1035.70		
No. of Registered Industrial units	33		

Chapter 8

Approach and Methodology

The first edition of District Good Governance Index (DGGI) of the UT of Jammu and Kashmir which was launched in January 2022, was developed by the Department of Administrative Reforms and Public Grievances, GoI in collaboration with the Institute of Management Public and Rural Administration using 58 indicators from 10 Governance sectors. The technical support for construction of Index was provided by the Centre for Good Governance, Hyderabad whereas the data was facilitated by the Directorate of Economics and Statistics, J&K. The selection of indicators was done after having extensive consultations with the senior officers of the DARPG, GoI and UT Government. Broadly, the following principles governed in finalizing the indicators:

- Simple and measurable
- Output and outcome oriented
- Applicability across the districts
- Primarily controlled by the districts

The process for identification of indicators, used in the **DGGI 1.0** has gone through extensive consultations with senior officers of DARPG, GoI and UT of Jammu and Kashmir in a series of meetings, accordingly, the same set of 58 indicators across 10 sectors along-with the methodology adopted for construction of Index, have been used for **DGGI 2.0**.

Components of District Good Governance Index Framework

The following 58 Indicators clubbed as part of DGGI 1.0 have been adopted for DGGI 2.0 10 Sectors finalized during the process of Jammu and Kashmir.

S.No	Sectors	No. of Indicators
1	Agriculture & Allied	11
2	Industry & Allied	05
3	Human Resource Development	09
4	Public Health	09
5	Public Infrastructure & Utilities	06
6	Social Welfare & Development	06
7	Financial Inclusion	03
8	Legal & Public Safety	04
9	Environment	02
10	Citizen Centric Governance	03
	Total	58

Methodology for Construction of DGGI

This section provides details about data capture from various sources of data and the process followed for calculating sector and indicator-wise scores for final ranking of the Districts as described below:-

Step I: Compilation of Necessary Data/ Information

Computation of scores for different indicators under 10 sectors prescribed in the DGGI Framework requires data on a large number of facets covering various aspects of governance at district level. To begin with, the index implementing agency needs to fix the reference year for ranking the Districts for data compilation purpose. Particularly, for growth-based indicators, data has to be compiled for three (at least) or five years (to be decided based on the data availability) preceding the reference year. The reference year used for growth based indicators in the DGGI 1.0 has been kept intact i.e. 2018-19. The data for this purpose has been collected from the District Development Commissioners.

Step II: Normalization of Indicator Values

Statistically, there is no sanity in comparing variables which are expressed in different units. Therefore, it is required to convert the variables with mixed scales into dimensionless entities, so that they can be compared and used for ranking purpose easily. This way of conversion is known as **normalization**. It helps in measuring and comparing composite indicators with ease. It also makes the aggregation of indicators meaningful. There are various methods available to normalize variables and attain scores for the Districts based on their performance on the identified indicators for compiling sector-wise/district-wise ranking. For the purpose of ranking the Districts as part of DGGI, the Dimensional Index Methodology is proposed to be used.

Dimensional Index Method is most commonly used for normalization of values and subsequent ranking. In this method, the normalized value of each indicator is obtained by subtracting the minimum value among these from the raw value of indicators and then dividing it by the data range (maximum – minimum value). The maximum and minimum values for each indicator are ascertained based on the raw values for that indicator across the Districts – combining all Districts without considering the existing Divisional (Jammu and Kashmir Divisions) categorization. This approach is specifically adopted so that such calculation would permit comparison across all Districts and can also be used for generating overall ranks – without considering the categorization.

The following two equations have been used to normalise the indicator values:

Dimensional Score for Positive Indicators:

$$\text{Score} = \frac{(\text{Indicator Value} - \text{Minimum Value})}{(\text{Maximum Value} - \text{Minimum Value})}$$

Dimensional Score for Negative Indicators:

$$\text{Score} = \frac{(\text{Maximum Value} - \text{Indicator Value})}{(\text{Maximum Value} - \text{Minimum Value})}$$

Where

Positive Indicator = for which Higher Value is better

Negative Indicator = for which Lower Value is better

Indicator Value = Available through Secondary Sources

Maximum Value = Highest Indicator Value among the Districts

Minimum Value = Lowest Indicator Value among the Districts

The above-mentioned equations has been undertaken after calculating Compound Annual Growth Rate (CAGR) over base year to used directly by taking the values of indicators for reference year. In case of the growth-based indicators, this exercise has been reference year for each indicator.

The following equation has been used for calculating CAGR:

$$CAGR = \left(\frac{\text{value of Reference Year}}{\text{value of Base Year}} \right)^{\left(\frac{1}{n}\right)-1} \times 100$$

where: n = number of periods

Step III: Assigning Weightages

Equal Weightage to Sectors:

As mentioned earlier, while conceptualizing DGGI, various aspects of governance, which are critical for growth, development and inclusiveness need to be measured, have been clustered under ten sectors. All the identified ten sectors are facets of equal importance from the point of view of citizen-centric approach for such comprehensive index at District level.

In addition, there is a possibility that during a particular period, one District might be more focused and channelizing its resources towards some limited prioritized sectors due to issues of area specific importance. And, at the same time, there is a possibility that one District might be giving equal importance to all sectors at once allocating resources equally/ proportionately. In such scenarios, there would definitely be a difference in outcomes achieved by either of the Districts. In such circumstances, the index should not provide any advantage or disadvantage to Districts for ranking purpose. Therefore, it is decided to give equal weightage to all sectors irrespective of the approach followed for ranking.

Differential Weightages for Indicators:

As already mentioned that outcome / output-based indicators were given priority for indicator selection and at the same time selection was restricted due to availability of data. Therefore, the outcome / output-based indicators are assigned higher weightage whereas proxy indicators (input/process-based) are assigned lower weightage. Assigning higher weightages to outcome/output-based indicators brings the focus on performance and achievements of the Districts.

Step IV: Computation of Scores and Ranking

After completing data normalization process, the normalized value of each indicator needs to be multiplied with weightage assigned to the indicator in order to obtain the final indicator score. These final individual indicator scores are aggregated to obtain a value for the sector. These aggregated values after multiplication with sector weight becomes the score for the sector and once sector wise scores are aggregated, it becomes District's DGGI Score to be used for ranking purpose.

List of Indicators & Weightages

Sector wise list of Indicators with weightage

Sector- wise list of indicators with required data-items to calculate the indicator value and the weight assigned to each indicator is detailed below

SNo	Sector	#	Indicators	Weights	Data Items Required
1	Agriculture & Allied Sector	1	Growth of Production of Food Grains	0.2	(a) Total food grains production of reference year 2022-23
					(b) Total food grains production of reference year - 1
					(c) Total food grains production of reference year - 2
					(d) Total food grains production of reference year - 3 (Base Year)
		2	Growth in Production of Major Horticulture Produce	0.2	(a) Total horticulture production of reference year
					(b) Total horticulture production of reference year - 1
					(c) Total horticulture production of reference year - 2
					(d) Total horticulture production of reference year - 3 (Base Year)
		3	Growth in Milk Production	0.05	(a) Total milk production of reference year
					(b) Total milk production of reference year - 1
					(c) Total milk production of reference year - 2
					(d) Total milk production of reference year - 3 (Base Year)
		4	Growth in Meat Production	0.05	(a) Total meat production of reference year
					(b) Total meat production of reference year - 1
					(c) Total meat production of reference year - 2
					(d) Total meat production of reference year - 3 (Base Year)
		5	Growth in Poultry Production	0.05	(a) Total poultry production of reference year
					(b) Total poultry production of reference year - 1
					(c) Total poultry production of reference year - 2
					(d) Total poultry production of reference year - 3 (Base Year)
		6	% of Mandis Linked to e-Mandis (e-NAM)	0.1	(a) Total number of Mandis linked to e-Mandis (e-NAM) till reference year
					(b) Total number of Mandis in reference year
		7	Crop Insurance	0.05	(a) Total area insured out of total area sown in the reference year (Rabi+Kharif)
					(b) Total area sown in the reference year (Rabi+ Kharif)
		8	Percentage increase in agricultural credit	0.05	(a) Total amount of agriculture credit provided in reference year 2021-22
					(b) Total amount of agriculture credit provided in reference year - 1
					(c) Total amount of agriculture credit provided in reference year -

SNo	Sector	#	Indicators	Weights	Data Items Required
					2
					(b) Total amount of agriculture credit provided in reference year – 3(Base year)
		9	% of Kisan Credit Card (KCC) issued	0.1	(a) Total number of KCC issued to farmers
					(b) Total number of eligible farmers for KCC
		10	No. of Soil Health Card distributed	0.1	(a) Total number of Soil Health Card to be Distributed (Target) in reference year
					(b) Total number of Soil Health Card Distributed (Achievement) in reference year
		11	% of Animals Vaccinated	0.05	(a) Total number of animals eligible for vaccination
					(b) Total number of animals vaccinated
2	Industries & Allied Sector	12	Increase in No. of Establishments Registered under GST	0.2	(a) Number of Establishment registered under GST in reference year
					(b) Number of Establishment registered under GST in reference year – 1
					(c) Number of Establishment registered under GST in reference year –2
					(d) Number of Establishment registered under GST in reference year –3 (Base Year)
		13	% Change in No. of MSME Units Registered under Online Udyog Aadhar Registration	0.2	(a) Number of MSME Units Registered under ODM + OEM-1 + OEM-2 in reference year
					(b) Number of MSME Units Registered under ODM + OEM-1 + OEM-2 in reference year - 1
					(c) Number of MSME Units Registered under ODM + OEM-1 + OEM-2 in reference year –2
					(d) Number of MSME Units Registered under ODM + OEM-1 + OEM-2 in reference year –3 (Base Year)
		14	% Increase in credit to handicrafts and allied sectors	0.3	(a) Credit provided to handicrafts and allied sectors in reference year
					(b) Credit provided to handicrafts and allied sectors in reference year – 1
					(c) Credit provided to handicrafts and allied sectors in reference year –2
					(d) Credit provided to handicrafts and allied sectors in reference year –3 (Base Year)
		15	Increase in credit for self-employment	0.15	(a) Credit provided for self-employment in reference year
					(b) Credit provided for self-employment in reference year – 1
					(b) Credit provided for self-employment in reference year –2
					(b) Credit provided for self-employment in reference year –3 (Base Year)
16	Increase in Tourist	0.15	(a) Number of tourists visited in reference year		

SNo	Sector	#	Indicators	Weights	Data Items Required
			Footfall		(b) Number of tourists visited in reference year – 1 (c) Number of tourists visited in reference year –2 (d) Number of tourists visited in reference year –3 (Base Year)
3	Human Resource & Development	17	Gender Parity Index at Secondary Level	0.1	Directly calculated figure Received from DC
		18	Retention rate at Secondary Level	0.25	Directly calculated figure Received from DC
		19	Enrolment Ratio of SC	0.05	Directly calculated figure Received from DC
		20	Enrolment Ratio of ST	0.05	Directly calculated figure Received from DC
		21	Pupil Teacher Ratio (RTE Specified)	0.15	Directly calculated figure Received from DC
		22	% of Schools with drinking water, separate Toilet and electricity Facilities	0.2	(a) Total number of government schools (including Government Aided) having all three facilities (drinking water + separate toilets + electricity) in reference year
					(b) Total number of government schools (including Government Aided) in reference year
		23	% of Schools with Access to Computers	0.05	(a) Total number of schools with access to computer in reference year
					(b) Total number of schools in reference year
24	No of children served Mid-Day Meals	0.1	(a) Number of children served mid-day meals in reference year		
			(b) Total number of eligible children for mid-day meals / number of student enrolled in schools		
25	Skill Trainings Imparted to Students	0.05	(a) Target allocated (persons) in reference year		
			(b) Training done (persons) in reference year		
4	Public Health	26	IMR per 1000 live births	0.1	Directly calculated figure Received from DC
		27	MMR per 1000 live births	0.1	Directly calculated figure Received from DC
		28	Full Immunization	0.1	(a) Achievement - total number of children vaccinated
					(b) Target - total number of children eligible for vaccination
		29	% of Institutional Delivery	0.2	(a) Total number of institutional deliveries in reference year
					(b) Total number of estimated deliveries in reference year
		30	% of Sub-centers/PHCs converted into Health & Wellness Centers (HWCs)	0.1	(a) Total number of sub-centers/PHCs converted into Health & Wellness Centers (HWCs)
					(b) Total number of sub-centers/PHCs
31	Proportion of Anganwadis with own buildings	0.05	(a) Total number of Anganwadis		
			(b) Number of Anganwadis with own buildings		
32	% of pregnant	0.05	(a) Total number of pregnant women received 4 or more complete		

SNo	Sector	#	Indicators	Weights	Data Items Required
			woman received 4 or more complete ANC check-ups + TT2/Booster + 180 IFA		ANC check-ups + TT2/Booster + 180 IFA in reference year (b) Total number of pregnant women registered in reference year
		33	Proportion of functional FRUs (First Referral Units) against the norm of 1 per 500,000 population (1 per 300,000 in hilly areas)	0.05	(a) Number of functional FRUs operational (b) Number of sanctioned FRUs as per norms
		34	% of Golden Card Issued under ABPMJAY / SEHAT Scheme	0.25	(a) Number of eligible beneficiaries for golden card under ABPMJAY / SEHAT Scheme (b) Number of Golden cards issued
5	Public infrastructure & Utilities	35	Housing for All under PMAY Urban and PMAY Grameen	0.3	(a) Total number of houses constructed/grounded out of sanctioned for construction PMAY (Grameen) (b) Total number of houses constructed/grounded out of sanctioned for construction - PMAY (Urban) (c) Total number of houses sanctioned for construction - PMAY (Grameen) (d) Total number of houses sanctioned for construction - PMAY (Urban)
		36	% of Households with Access to Safe Drinking Water	0.2	(a) Total number of HHs having access to water supply connection within premise from treated source- Rural (b) Total number of HHs having access to water supply connection within premise from treated source-Urban (c) Total number of Households (HHs) – Rural (d) Total number of Households (HHs) - Urban
		37	% of Households with Improved Sanitation Facility	0.2	(a) Total number of HHs having access to sanitation - Rural (b) Total number of HHs having access to sanitation - Urban (c) Total number of HHs – Rural (d) Total number of HHs – Urban
		38	% of Households Electrified to Total Households	0.1	(a) Total number of households electrified (Rural+Urban) (b) Total number of households (Rural + Urban)
		39	Cumulative number of kms of all-weather road work completed as a % of total sanctioned kms in the district under PMGSY	0.1	(a) Total length of all-weather road work sanctioned in the district under PMGSY (b) Total length of all-weather road work completed in the district under PMGSY
		40	% increase in black top roads as % of total roads	0.1	(a) Total length of black top roads in reference year (b) Total length of all roads in reference year
6	Social Welfare &	41	% of Aadhaar		(a) Total number of Aadhaar seeded Ration Cards

SNo	Sector	#	Indicators	Weights	Data Items Required
	Development		seeded Ration Cards	0.25	(b) Total number of Ration Cards
		42	Off-take of Grains	0.25	(a) Total quantity of grain lifted out of sanctioned quantity under TPDS and SSS in reference year
					(b) Total quantity of grain sanctioned for lifting under TPDS and SSS for reference year
		43	Average days of employment provided per household under MGNREGA	0.1	(a) Total number of person-days as employment provided in reference year
					(b) Total number of registered persons provided employment (worked) in reference year
		44	Atal Pension Yojana: number of beneficiaries per 1 lakh population	0.2	(a) Total number of beneficiaries covered under Atal Pension Yojana
		(b) Total number of eligible beneficiaries			
		45	Number of enrolments per 1 lakh population under - Pradhan Mantri Suraksha Bima Yojana (PMSBY) and Pradhan Mantri Jeevan Jyoti Bima Yojana (PMJJBY)	0.1	(a) Total number of beneficiaries – PMSBY+PMJJBY
					(b) Total number of eligible beneficiaries
		46	Percentage of beneficiaries under NSAP and ISSS Scheme	0.1	(a) Total number of beneficiaries under NSAP and ISSS Scheme
					(b) Total number of eligible beneficiaries
7	Financial Inclusion	47	Financial inclusion under Jan Dhan Yojana	0.35	(a) Total number of bank accounts opened under Jan Dhan Yojana
					(b) Total number of eligible beneficiaries
		48	Total disbursement of Mudra Loan (in Crores) per one lakh population	0.35	(a) Total disbursement under Mudra Loan
			(b) Total population of District		
		49	% increase in total disbursement (in Lakhs) on self-employment Schemes	0.3	(a) Total disbursement under self-employment in reference year
					(b) Total disbursement under self-employment in reference year - 1
					(c) Total disbursement under self-employment in reference year – 2
					(d) Total disbursement under self-employment in reference year – 3 (Base Year)
8	Legal & Public Safety	50	Number of road accidents per 1 lakh population	0.1	(a) Total number of road accidents in reference year
					(b) Total population of the District
		51	Incidence of crime against women	0.25	(a) Total number of registered crimes against women in reference year
		(b) Total women population of the District			
		52	Incidence of crime against children	0.25	(a) Total number of registered crimes against children in reference year

SNo	Sector	#	Indicators	Weights	Data Items Required
) Total children population of the District
		53	Conviction Rate	0.4	(a) Cases convicted in reference year
					(b) Cases in which trials were completed in reference year
9	Environment	54	Change in Forest Cover	0.6	(a) Total area under forest cover in reference year
					(b) Total area under forest cover in reference year – 1
		55	Water bodies and wetland protection	0.4	(a) Total number of water bodies protected
					(b) Total number of water bodies
10	Citizen Centric Governance	56	Status of Grievance Redressal	0.3	(a) Total number of grievances redressed in the reference year
					(b) Total number of grievances registered in the reference year
		57	% Govt Services Provided to Citizens Online to total services as per Guarantee Act	0.35	(a) Total number of Govt. services provided online
					(b) Total number of Govt. services to be provided as per Guarantee Act
58	% of Government offices converted to e-office	0.35	(a) Total number of Government offices		
			(b) Total number of Government offices converted to e-office
